**I. Read, then answer the questions below**

Mozart, who was born on January 27, 1756 in the Austrian city of Salzburg, was neither the first nor the last child prodigy, but he was certainly the greatest. He was born into a moderately prosperous family where his unmatched musical genius made itself known extremely early. Mozart began learning to play the harpsichord at three and his earliest known work was composed in 1761 when he was five, the age at which he also first appeared in public. From the age of six, when his father took him on the first foreign tour, Mozart toured the courts and musical centres of Austria, Germany, France, England, Holland, Switzerland and Italy. It has been calculated that Mozart spent almost a third of his short life - he died at the age of 35 - travelling. As Mozart matured, he continued to tour and give concerts. Mozart also wrote a lot of operas. His first opera, *Mitridate, Re di Ponto*, was performed in Milan when he was 14, and it was the first of many successes in the theatre.

Dear Mom,

This is just a quick note to tell you how the holiday is going.

We have had some good weather since we got here, so we are feeling very happy. We have seen some of the beautiful sights and a few museums, and we thought they were very impressive. Yesterday we decided to go for a swim, and we went to a nice beach where the water was blue and clean. Last night, we had a delicious meal in a wonderful restaurant. The food and services were excellent. When the bill came, we could hardly believe it, as it was so cheap. As our hobbies are sightseeing and swimming, we enjoyed the holiday so much.

## II. Read and write the answers to the questions below:

**F**or thousands of years, the ancient art form of Feng Shui has played a major role in Chinese life. Feng Shui means ‘wind and water’ and it is based on an appreciation of the relationship between people and the environment. It involves changing the design of your living or working space to improve your fortune For instance, soon after a Hong Kong millionaire moved his business to a new skyscraper, his business began to do very badly. He immediately called in Feng Shui experts. They told him that because his new office block was round, it was like a huge cigarette, and all the energy was burning off through the roof. They said that the only thing he could do to prevent this loss of energy was to build a swimming pool on the roof. The millionaire followed their advice, and his business immediately started to do well.

In recent years, Feng Shui has become popular in many western countries, where companies such as B&Q have started to seek advice from Feng Shui experts. Before his store was opened, Brian Ingliss, the manager of one of B & Q's stores in Britain, consulted a Feng Shui expert. The expert advised him to create a lot of free space around the store. ## Test 17

### Multiple choices

**U**pon the creation of the United States, one of the core concepts on which the hopes for the new democracy were pinned was the ideal that its citizens would be *enlightened individuals* with clearly articulated rights and the opportunity for individual achievement and education. It was believed that in a free nation where the power belongs to the people, the commitment to education defines the progress of that democracy and is the catalyst for future progress. This core value has not only stood the test of time but has also grown in importance. In this new Information Era and international economy, education is an increasingly vital commodity, a precursor of potential success and a driving force of change. It is important to recognize, however, that we approach education today differently than in the past, partly because the kinds of jobs people had didn't require the kind of basic education and specialized training that is often required in the workforce today. In the 1950s, for instance, only 20 percent of American jobs were classified as professional, 20 percent as skilled, and 60 percent as unskilled. Today, our world has changed. The proportion of unskilled jobs has fallen to 20 percent, while skilled jobs now account for at least 60 percent of the workforce. Even

more important, almost every job today increasingly requires a combination of academic knowledge and practical skills that require learning throughout a lifetime.

**1: Education is defined in this passage as a driving force of change because \_\_\_\_\_.**

- A. without education, no changes could have happened in American society so far
- B. the government of the United States want to drive social changes in their own ways

- D. any American citizen who wants to change his driving licence must be very well-educated

**2: The passage shows the percentage of jobs that require higher training in the US \_\_\_\_\_ between the 1950s and now.**

- A. has remained the same
- B. has changed dramatically
- C. has been reversed
- D. has changed slightly

- A. always appear brilliant-looking in public
- B. have often been well-exposed to light
- C. have acquired an adequate level of education
- D. bring light to anywhere they go

**4: In order to become a good American citizen today, in the author's point of view, any individual must \_\_\_\_\_.**

- A. know well all his/her rights and be ready to grasp his/her opportunity of success in life
- B. study carefully the history of American educational and vocational systems even since their creation
- C. understand thoroughly the combination of academic knowledge and practical skills

### Test 18

**I. Read, then do the alternation below:**

Sometimes you know things about people the first time you see them, for example, that you want to be friends with them or that you don't trust them. But perhaps this kind of intuition isn't as hard to explain as it may seem. For instance, people give out body language signals all the time. The way you hold your body, head and arms tells people about your mood. If you hold your arms tightly at your sides, or fold them across your chest, people will generally feel that you are being defensive. Holding your head to one side shows interest in the other, while an easy, **open** posture indicates that you are self-confident. All this affects the way you feel about someone.

Also, a stranger may remind you of a meeting with someone. This may be because of something as simple as the fact that he or she is physically similar to someone who treated you well or badly. Your feelings about a stranger could be influenced by a smell in the air that brings to mind a place where you were happy as a child. Since even a single word can bring back a memory such as that, you may never realize it is happening.

**1. What does the word "open" in the passage most closely mean?**

- A. Unrestrained.
- B. Relaxed.
- C. Confined.
- D. Unlimited.

**2. What influences your impression of a person you meet the first time?**

- A. Intuition.
- B. Familiarity.
- C. Knowledge.
